SUMMARY

I am Yasir shabir, a vue.js Developer at UZR Tech in Kohat with over a **1 year of experience.** I am currently doing my bachelor from allama iqbal open university. I love building front-end applications using **bootstrap**, **Tailwind** and **vue.js**. I enjoy keeping up with industry trends and using the latest technologies to create great-looking applications. Outside of work, I am always eager to connect with fellow professionals and explore opportunities for collaboration and growth in my field.

❖ **PROFESSIONAL WORK EXPERIENCE**

vue.js developer

Uzr tech

📅 10/2023 - Present   📍 Kohat

- Led frontend development with bootstrap CSS and vue.Js , translating designs into responsive UIs across devices, enhancing application performance.
- Optimized user interfaces for adaptability across mobile, tablet, and desktop, ensuring seamless integration with backend APIs for comprehensive solutions.
- Mentored interns, boosting their code quality and productivity and reduced user-reported issues through effective error handling.
- Cut down bug resolution time through prompt troubleshooting and debugging, maintaining high code quality with Git for version control.
- Spearheaded the development of a responsive admin UI for City sport in vue.js, elevating user engagement with features like Protected Routes and Authentication.
- Enhanced admin side efficiency through a multilingual app for order management, integrating APIs for comprehensive CRUD operations and role-based access.
- Implemented key features including Booking, Content, and User Management, alongside managing Products, Categories, Subcategories, and Stores.
- Streamlined complex code with descriptive names, comments/documentation, ensuring maintainability and ease of understanding for other developers.

vue.js Internship

Uzr tech

📅 11/2022 - 07/2024   📍 Kohat

- Skills Learned: HTML and CSS, Tailwind, JavaScript,vue.js and bootstrep5.
- Framer Motion (Basics)

PROJECTS

Alther

This application is multilingual app used for ordering products.

- I developed its admin panel using vue.js and bootstrap5, which is fully responsive and includes integration with APIs.

Using admin panel, admin can perform CRUD operations related to Shops, Products, Categories, Sub-categories etc. It has also role-based access management to access different features of the app.

- Some of the important features include the following:
- Protected Routes
- Authentication
- Countries Management
- Languages Management
- Roles Management
- Products Management
- Product Categories and Sub-categories Management
- Managing Stores and their categories
- Managing Shops
- User management (add user, view all users, update user information, etc.)

City sport

This project helps students find tutors who best suit their needs. I've worked on designing and creating a responsive UI for its admin side using vue.js and bootstrap5.

- In this project, admin manages all data. Admin can view of customer and can also view transactions details of customer.
- A few other important features that I have developed include:
- Protected Routes
- Authentication
- Booking Management
- Content Management
- User Management

Food king

This project revolves around the concept of 'Searching Barber Shop' efficiently.

- I have worked on developing the landing pages and its UI using HTML and bootstrap.
- The landing pages contains following features:

Searching the barber shop near by the user or all over the world Schedule the timings / Make appointment.

Self Learning Projects

For self-learning, I've also developed bunch of applications that leverages javaScript and vue.js.

_____

❖ **SKILLS**

  ➢ Bootstrap5
  ➢ Figma
  ➢ Sass
  ➢ GitHub
  ➢ Firebase Front-end
  ➢ Vue.js
  ➢ Tailwind CSS

❖ **LANGUAGE SKILLS**

  ➢ Command on English, Urdu, & Pashto.
